Demonstration projects: data, websites, brand and motion

How I work

Each project below was built end to end to show method, not just a nice result. Every number was measured; every demonstration is labeled.

Data first

I start from the business owner's question, then pick the tool (Excel, Power BI, SQL, Python).

Two reviews before delivery

Every deliverable goes through a director's read and a skeptical client's read, with a lap count.

Verifiable

Automated tests, contrast audit, Lighthouse and axe. Numbers on screen come from code, not estimates.

Privacy

Fictional data in every test; OCR check of videos before any public use.

AI as a tool

I use AI for development and analysis, with design, decisions and review done by me.

TOOLS

Power BI

Excel

Power Query

SQL

Python

After Effects

Premiere Pro

Illustrator

Photoshop

Remotion

TypeScript

Astro

Git e GitHub

Claude

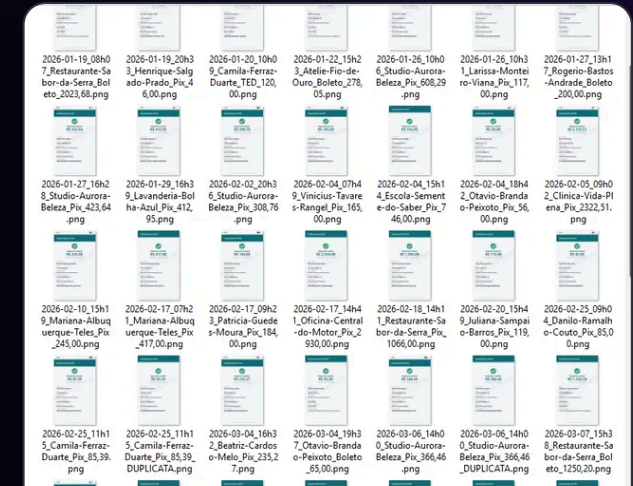

From a messy folder to a dashboard

A folder of 126 randomly named receipts becomes a reliable dataset and a dashboard that answers the owner's questions. AI reads each document; the result is checked row by row.

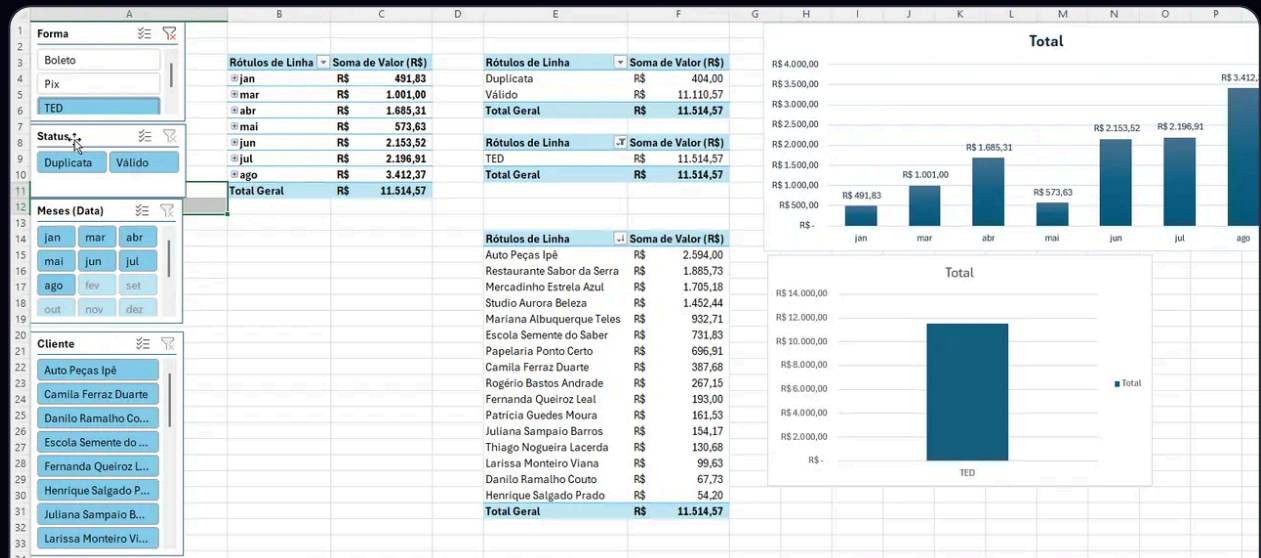

- ◆ 126 fictional receipts
- ◆ 6 duplicates found
- ◆ 0 divergences across 126 checked rows
- ◆ R\$ 98,007.33 in the period (fictional)

Before: messy folder

Standardized names

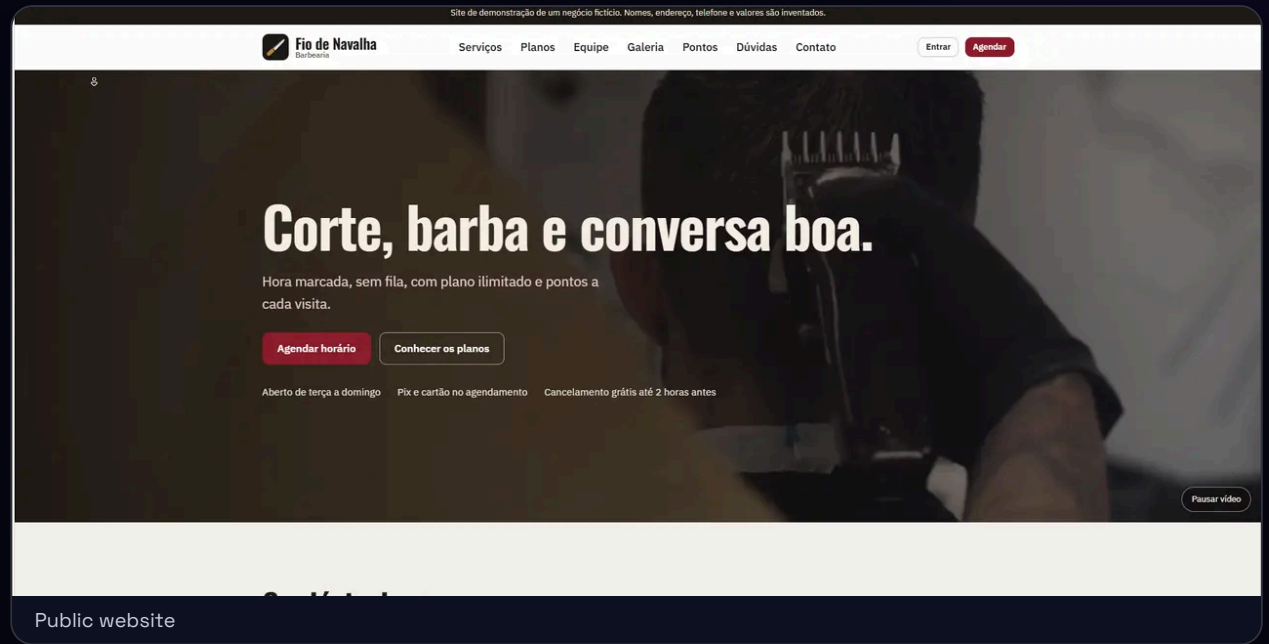

Excel dashboard

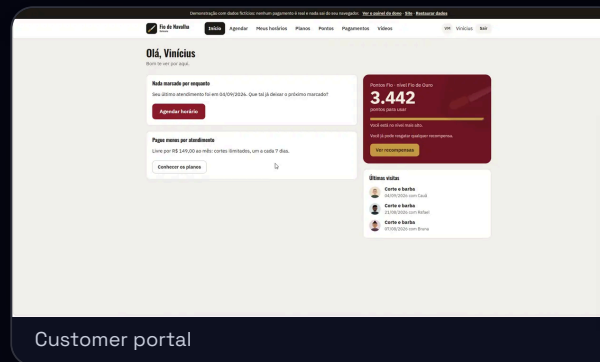

Fio de Navalha Barbershop (fictional business)

Public website with menu, plans and booking; customer portal with simulated payment, plans and loyalty points; owner dashboard with schedule, marketplace-style statement, fees, cash flow, P&L, subscriptions, loyalty and CSV.

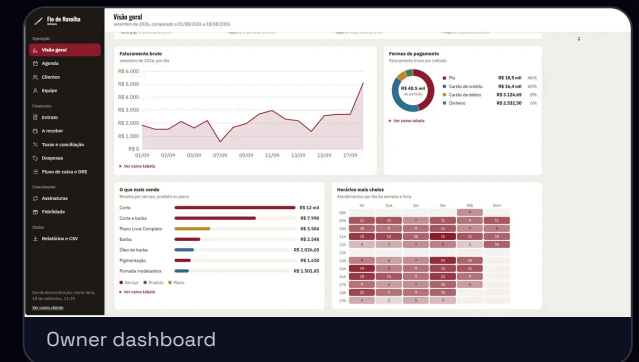

- ◆ Money stored as integer cents
- ◆ CSV, screen and ledger match (tested)
- ◆ 42 automated tests and continuous integration in the repository for both businesses
- ◆ Data from 01/01 to 09/18/2026, generated deterministically

Public website

Customer portal

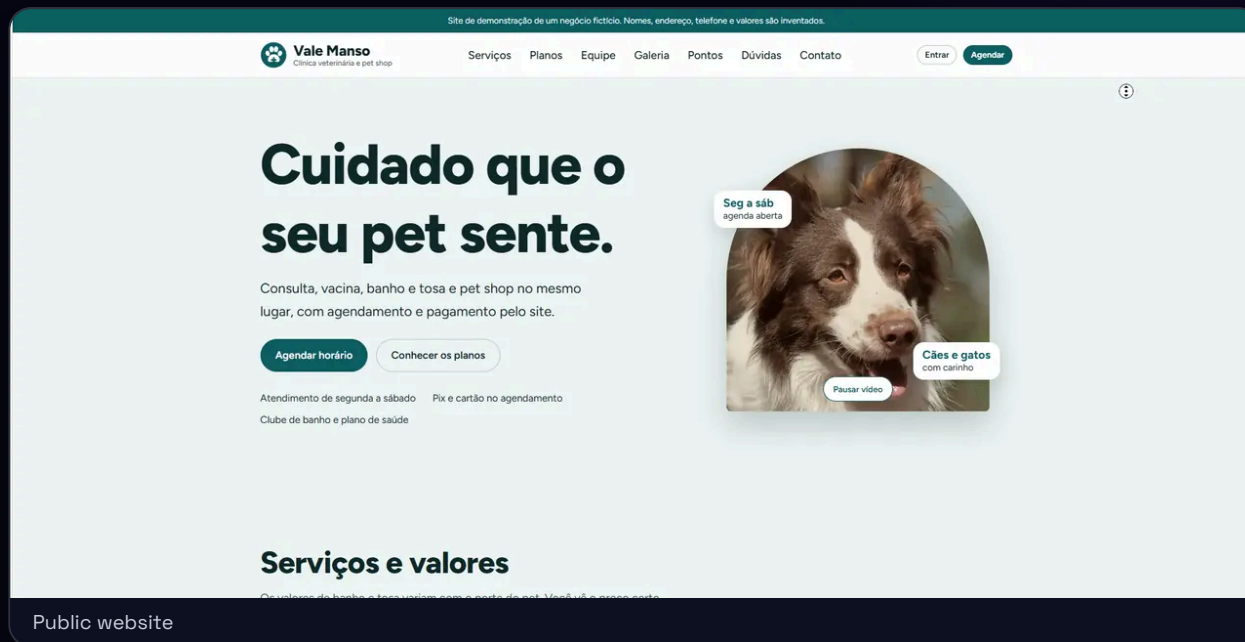

Owner dashboard

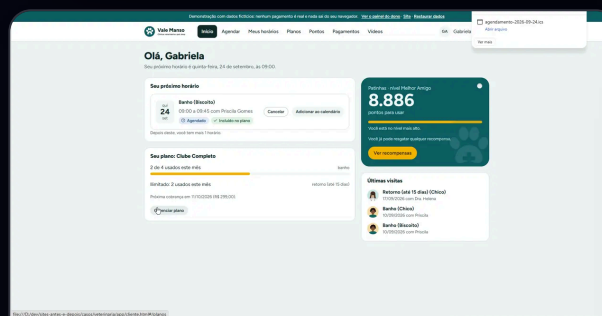

Vale Manso Vet Clinic & Pet Shop (fictional business)

A second business with its own rules: services and prices, illustrated team, plans with fair use, pet-owner portal and reports with on-screen preview and CSV export for the accountant.

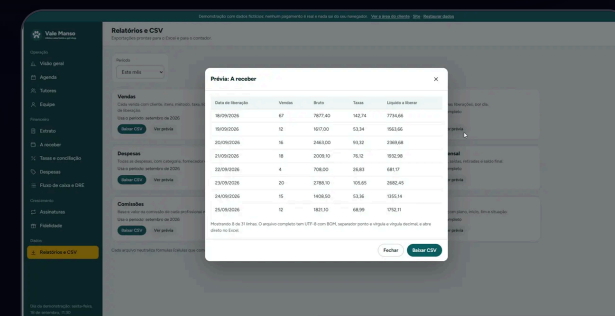

- ◆ Illustrated portraits, never photos of real people
- ◆ Login, card and Pix simulated and disclosed
- ◆ No invented testimonials

Public website

Customer portal

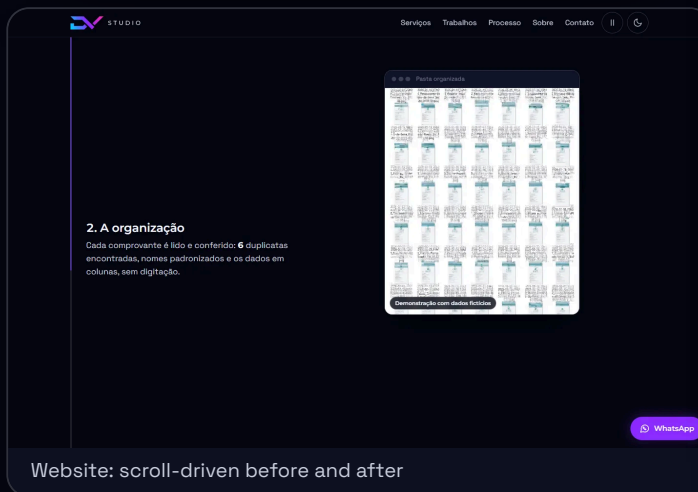

Reports and CSV

DV STUDIO brand and website

A complete brand system and an institutional website with motion: app window with real screen recordings, a scroll-driven “before and after”, and a button to pause animations and videos.

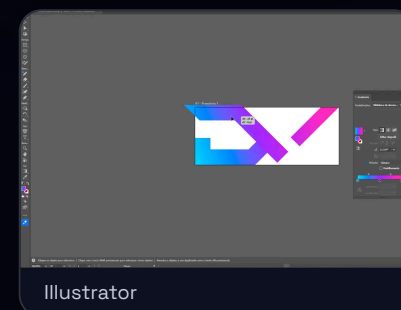

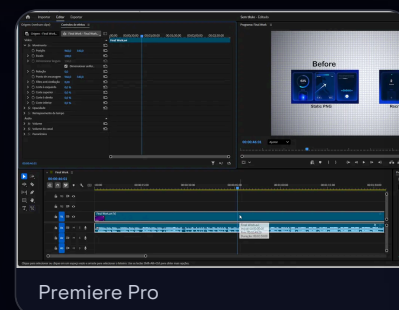

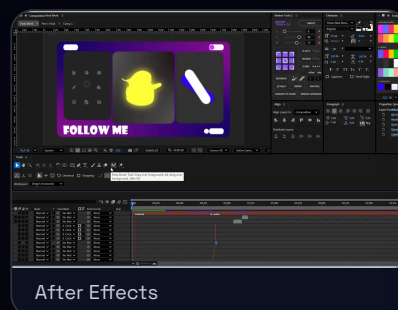

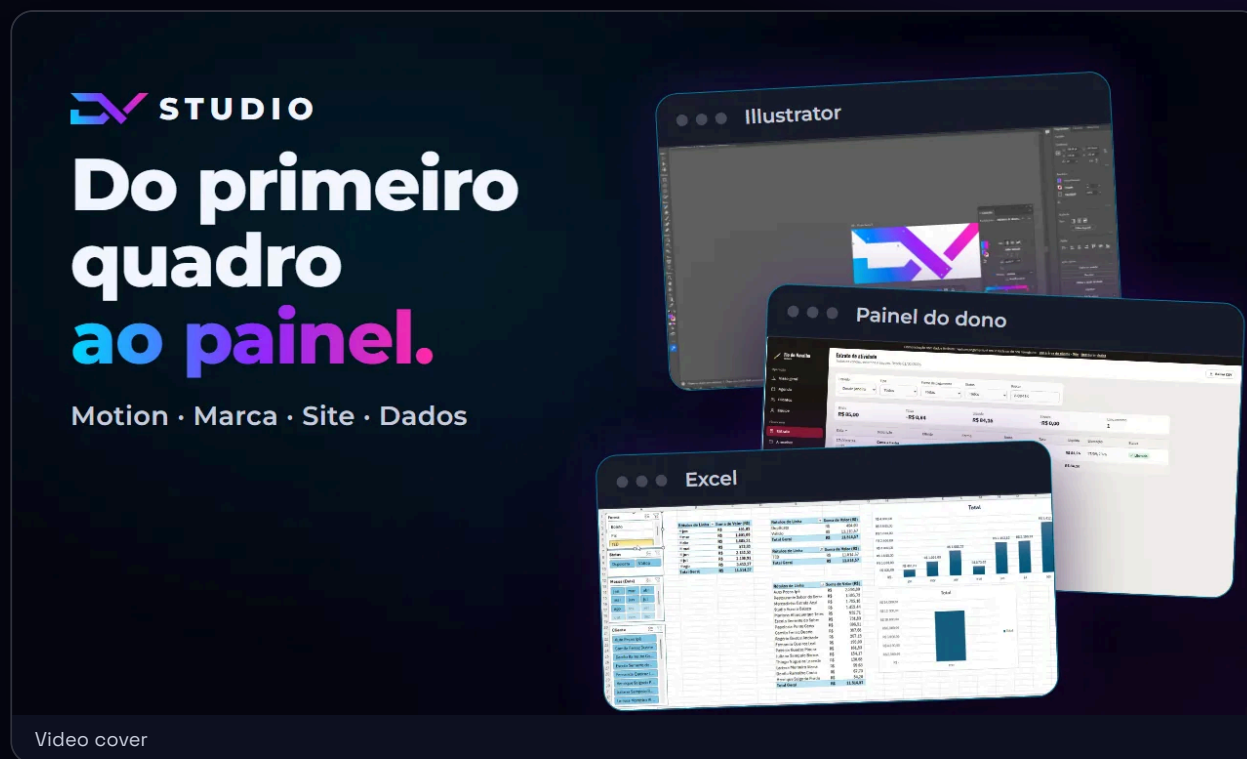

- ◆ 38 color pairs audited for WCAG AA contrast
- ◆ Mobile Lighthouse 99 to 100; 0 axe-core violations
- ◆ CLS 0 and 2.5 KB of JavaScript
- ◆ 16-page brand book, proposal template and email signature

Portfolio video and motion

A 1:51 video showing how the work is made, with cuts on the beat of a 132 BPM track, versions for YouTube, Reels, Shorts, feed and LinkedIn, and cover images.

- ◆ 8 formats: 16:9, 9:16, 4:5 and 1:1
- ◆ Loudness -14 LUFS, true peak up to -1.6 dBFS
- ◆ OCR check of 295 frames: 0 sensitive data
- ◆ No voice-over; licensed soundtrack

DV STUDIO

Let's talk

Open to conversations about data and BI roles and about video, motion and training projects. Data & AI projects on request.
